EXPLORE THE PORTFOLIO

Strong engineering. Reliable construction.

4K Proje is an Istanbul-based contracting company providing engineering and construction services in transport infrastructure, civil structures, reinforced concrete, technical buildings, steelwork and architectural finishes.

We manage planning, mobilisation, site management, quality control, occupational health and safety, and handover processes through a single integrated management approach.

OPERATING MODEL

Engineering + Construction + Project Management

One quality standard across diverse structures.

01

Infrastructure and civil structures

Culverts, underpasses, drainage, channels and transport infrastructure.

02

Reinforced concrete and structural works

Foundations, formwork, reinforcement, concrete and load-bearing systems.

03

Buildings and technical structures

Technical buildings, ancillary facilities and special-purpose structures.

04

Steelwork and architectural works

Steel fabrication, building envelope, interiors and finishing works.

Tangible results from the field.

SCOPE OF WORK

Steelwork, envelope and interiors

WORK SCOPE

- 01 Steel fabrication
- 02 Building envelope
- 03 Interior applications
- 04 Finishing works

Quality, safety and the environment as one integrated whole.

01 Quality management We monitor production against design, technical specifications and inspection plans, and secure traceability through site records.	02 Occupational health and safety Risks are assessed before work begins; site order and protective equipment are treated as integral parts of the work culture.	03 Environmental responsibility We seek to reduce environmental impact through responsible resource use, waste management and orderly work areas.
